Do not operate this unit unless it is completely assembled.

There are no user-serviceable parts inside the unit.

Getting Started

1. Press the *Control Button* once to turn pureAir FRIDGE ON.

NOTE: The *Power Indication LED* will turn Green when the unit is activated. Once the refrigerator door is closed, the LED will turn off to preserve your unit's battery life.

2. Place the unit anywhere in your refrigerator, making sure the *Purified Air Vent* is not covered or restricted in any way.
3. Press the *Control Button* once more to cease operation and turn the unit OFF.

Recharging

NOTE: When your battery has used all of its charge, an audible alarm and *Red Power Indication LED* will notify you each time you open your refrigerator door. This audible alarm and Red LED will only activate when light hits the photo sensor.

1. Remove the unit from the refrigerator and plug your charging cable into the rear *USB Charging Port* until the *Power Indication LED* changes from RED to GREEN.

Cleaning/Maintenance

NOTE: For proper operation, the unit should be cleaned every six (6) months.

1. Remove the unit from your refrigerator and turn it off by pressing the *Control Button* once.
2. Vacuum out the *Air Intake* and *Purified Air Vent* until clean.

NOTE: Blowing air into the *Air Intake* or *Purified Air Vent* in order to clean the unit is not advised. This will only restrict future air flow and pollute the quality of air being emitted by your unit.

3. Dip a cotton swab (Q-Tip) in Isopropyl Alcohol and insert it into the *Purified Air Vent*. Gently rotate the swab and clean the entire area until all visible contamination has been removed. Use a new cotton swab to dry the previously cleaned area. Repeat with the *Air Intake Vent*.
4. Allow the unit to dry before charging or resuming operation.

NOTE: There are no serviceable parts in this unit. If you have any problems, contact your dealer or GreenTech Environmental at 1-800-621-7201 or www.GreenTechEnv.com/Support.
